CONTACT DETAILS OF THE BODY SUBMITTING THE QUALIFICATION FILE

Directorate General of Training (DGT)
Government of India, Ministry of Skill Development and Entrepreneurship,
1st and 2nd Floor, CIRTES Building
Next to Pusa ITI, Pusa Campus
New Delhi - 110012

Name and address of submitting body:

Directorate General of Training (DGT)
Government of India, Ministry of Skill Development and Entrepreneurship,
1st and 2nd Floor, CIRTES Building
Next to Pusa ITI, Pusa Campus
New Delhi - 110012

Name and contact details of individual dealing with the submission

Name: Shri Deepankar Mallick

Position in the organisation: Deputy Director General (C & P)

Address if different from above:

Tel number(s): 011-25847035

E-mail address: deepankar.mallick60@nic.in

List of documents submitted in support of the Qualifications File

- 1. Competency-based curriculum (Annexure 1)
- 2. Advertisements of different organisations for posts relevant to NTC in the trade

Model Curriculum to be added which will include the following:

- Indicative list of tools/equipment to conduct the training: Enclosed with curricula
- Trainers qualification: Indicated in the curriculum
- Lesson Plan: All NCVT curricula are designed indicating specific practical to be carried out during training along with details of trade theory. Based on this the concerned instructor prepares the Lesson Plan with support of Reference Books and IMPs developed by DGT.
- **Distribution of training duration into theory/practical/OJT component:** Indicated in the curriculum.

SUMMARY

1	Qualification Title	Civil Engineering Assistant
2	Qualification Code, if any	DGT/1088
3	NCO code and occupation	3112.9900 - Civil Engineering Technicians 3112.0100 - Overseer, Civil Engineering
4	Nature and purpose of the qualification (Please specify whether qualification is short term or long term)	 National Trade Certificate; to train the 10th class pass students in 'Civil Engineering Assistant' trade and thus changing a non-worker to worker. Long Term Qualification
5	Body/bodies which will award the qualification	National Council for Vocational Training (NCVT) affiliates the ITIs as per guidelines issued time to time.
6	Body which will accredit providers to offer courses leading to the qualification	National Council for Vocational Training (NCVT)
7	Whether accreditation /affiliation norms are already in place or not, if applicable (if yes, attach a copy)	Yes. The accreditation/ affiliation norms for all training providers are as per DGT guidelines issued from time to time with approval of NCVT. This is available in DGT website – www.dget.nic.in
8	Occupation(s) to which the qualification gives access	Civil Engineering Assistant has a wide scope of Employability ranging from self-employment, contractual employment to Industrial jobs. On successful completion of this course, the candidates shall be gainfully employed in the industries for following occupations: • Civil Engineering Technicians • Overseer, Civil Engineering
9	Job description of the occupation	The individual in this job supervises construction of buildings, roads, canals etc. according to specifications/drawings and attends to their repair and maintenance under guidance of Engineer In Charge. Inspects site, prepares rough estimates, undertakes contour surveys, conducts levelling operations, marks lay out according to plan and instructions and commences work under his guidance and supervision. Checks materials to ensure their conformity with prescribed specifications. Measures completed portion of work and gets them checked and approved by the engineer concerned. Maintains accounts of departmental work and records of day to day measurements, labour engaged, materials used etc.
10	Licensing requirements	N/A
11	Statutory and Regulatory requirement of the relevant sector (documentary evidence to be provided)	N/A

12	Level of the qualification in the NSQF	Level 5	-	
13	Anticipated volume of training/learning required to complete the qualification	SI. No.	Course Element	Notional Training Hours
		1.	Professional Skill (Trade Practical)	2680
		2.	Professional Knowledge(trade theory)	558
		3.	Workshop Calculation & Science	186
		4.	Employability Skills	110
		5.	Extracurricular activities /lib.	186
		6.	In plant trg./Project work	120
		7.	Revision & Examination	320
			Total	4160
14	Indicative list of training tools required to deliver this qualification Entry requirements and/or	•	Annexure - I enclosed with the o	
	recommendations and minimum age		tion with Science and Mat	
16	Progression from the qualification (Please show Professional and academic progression)	 Can take admission in Diploma course in notified branches of Engineering by lateral entry. Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC). Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming an instructor in ITIs. Can join as Assistant supervisor in construction site of high Rise Buildings/Architect's office/Builders Start own agency for construction equipments contract /own building maintenance contract 		
17	Arrangements for the Recognition of Prior learning (RPL)	1. At p with can	resent the students who have present the students who have present minimum 3 years' experience appear for NCVT theory and present the students are presented to the students of the students are presented to the students of the students are presented to the students of th	passed 10th class e in relevant field

			ettiti Engineerin	8 11001011111
		in 'Civil Engine	who have passed SCVT ering Assistant' can als nination in the relevant s	o appear for

SECTION 1 ASSESSMENT

21	Body/Bodies which will carry out assessment:	
	National Council for Vocational Training (NCVT)	
22	How will RPL assessment be managed and who will carry it out?	
	1. At present the students who have passed 10th class with minimum 3 years'	
	experience in relevant field can appear for NCVT theory and practical semester	
	examination directly.	
	2. The students who have passed SCVT examination in 'Civil Engineering Assistant'	
	trade can also appear for the NCVT Examination in the relevant semester and Trade	
	directly. NCVT will carry out the assessment and State Directorates advertise in	
	newspapers for informing the prospective candidates.	
23	Describe the overall assessment strategy and specific arrangements	

Describe the overall assessment strategy and specific arrangements which have been put in place to ensure that assessment is always valid, reliable and fair and show that these are in line with the requirements of the NSQF.

(1) Assessment process:

The assessment for the semester-based qualification is carried out by conducting formative assessments, and end-of-semester examinations. The internal assessments for theory subjects and practical are conducted by the concerned instructors for evaluating the knowledge and skill acquired by trainees and the behavioural transformation of the trainees. This internal assessment is primarily carried out by collecting evidence of competence gained by the trainees by evaluating them at work based on assessment criteria, asking questions and initiating formative discussions to assess understanding and by evaluating records and reports, and sessional marks are awarded to them. Examinations are conducted in practical and Theory viz. Trade theory, Workshop Calculation & Science, and Employability Skills. The question papers for the theory Examinations contain objective type questions. Trade practical examinations are conducted by the respective State Governments. However, the question papers for the Trade practical are prepared by NCVT.

The marking pattern and distribution of marks for the qualification are as under:

The marking pattern and distribution of marke for the qualification are as ander.		
Marking Pattern		
SI.	Subject for the trade test	Maximum marks for the each subject
No.		
a)	Practical	300
b)	Trade Theory	200
		Objective type Written test of 200 marks
c)	Employability Skills	(Trade Theory 150 marks & Employability
		Skills 50 marks)
d)	Work shop Calculation and	100
	Science.	Objective Type Written test of 100 marks

e)	Internal assessment	100
	TOTAL:	700

(2) Minimum pass marks:

40% for each Theory Examination and 25% for each part/section of the Examination separately, and 60% marks for each Trade practical Examination.

(3) Testing and certifications for the course:

- OMR sheet based question paper.
- A panel of expert paper setters, who are graduates in the concerned field with minimum 5-7 years experience, is prepared for setting question papers for the Trade.
 The panel is vetted by the Member Secretary, NCVT.
- Paper setters are appointed from the panel after the approval of the competent authority for setting the question paper.
- The question papers are then moderated by the Board of Moderation to see if the paper is set as per the requirement and syllabus.
- The manuscripts of the moderated question papers are sent to Government Printing Presses for printing.
- Printed question papers, packed in sealed covers, are despatched to Banks/Police Stations for keeping in safe custody.
- The question papers are handed over to the Chairman/Principal of the Testing Centre two hours before the commencement of the Examination.
- An Examination Board consisting of representatives of industry/Employer/State Government are set up to supervise and monitor the conduct of Examinations at every Centre.
- Theory and practical Examinations are carried out with invigilators/examiners with the overall supervision of the Examination Board.
- Examiners called for evaluation of practical should have minimum technical qualification of a Diploma in the respective engineering field. However, when diploma holders not available, the qualification is suitably relaxed.
- Examiners for practical Examinations are appointed preferably from Polytechnics
 /Engineering colleges/Industry of repute. Government Departments or from amongst
 retired qualified personnel possessing requisite qualifications and sufficient experience
 in the trade/discipline.
- Each State Directorate prepares a panel of Examiners according to the norms as mentioned above and the Examiners are appointed from the panel.
- Flying squads from State Governments as well as the Central Government are constituted to check malpractices during the conduct of Examinations.
- OMR based answer sheets are evaluated by the third party evaluator only. Third party evaluator is selected for three years by open bidding process.
- Evaluation of every practical examination is carried out by the concerned examiner (from industry/ polytechnics) with the overall supervision of the Examination Board in a free and fair manner as per the assessment criteria.
- Till 2014, the marks were compiled by the State Governments as per NCVT guidelines and the results were declared by the State Governments. At present, the marks are compiled by NCVT on its portal www.ncvtmis.gov.in and the results are declared by the State Governments.

• The successful trainees are awarded National Trade Certificates.

Overall assessment strategy:

Assessment of the qualification evaluates trainees to show that they can integrate knowledge, skills and values for carrying out relevant tasks as per the defined assessable outcomes and assessment criteria. The trainees may choose the preferred language for assessment. The underlying principle of assessment is fairness and transparency. While assessing the trainee, assessor is directed to assess as per the defined assessment criteria against the assessable outcomes. The evidence of the competence acquired by the trainees can be obtained by conducting theory and practical examinations, observing the trainees at work, asking questions and initiating formative discussions to assess understanding and evaluating records and reports. The ultimate objective of the assessment is to assess the candidates as per the defined assessment criteria for the assessable/ learning outcomes.

Specific Arrangements for assessment:

- Assessment is outcome-based.
- There are formative and summative assessments in Theory and Practical.
- Assessment is carried out in Trade theory, Trade Practical, Workshop Calculation and Science, and Employability Skills.
- While Trade Theory and Trade Practical are used for assessing Trade-related jobs, Workshop Calculation and Science is used to test trainee's numerical skills, Drawing is used to test the ability of the trainee to draw and read sketches and Employability skills is used to test the communication, professional language, leadership, entrepreneurship and team-work abilities of the trainee.
- In addition to demonstration of theory and practical knowledge, trainees get a chance to present total personality.

Quality assurance activities:

- Question papers are set by external paper setters
- Evaluation of Theory Examinations is done by third-part agency. Third party evaluator is selected for three years by open bidding process.
- Trade Practical is examined by External Examiner (as explained above).

Please attach most relevant and recent documents giving further information about assessment and/or RPL.

Give the titles and other relevant details of the document(s) here. Include page references showing where to find the relevant information.

24. ASSESSMENT EVIDENCE

Complete a grid for each component as listed in "Formal structure of the qualification" in the Summary.

NOTE: this grid can be replaced by any part of the qualification documentation which shows the same information – i.e. Learning Outcomes to be assessed, assessment criteria and the means of assessment.

Title of Component: Civil Engineering Assistant

Means of assessment 1

Assessment will be evidence based comprising the following:

- Job carried out in labs/fields
- · Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Means of assessment 2

Add boxes as required.

Pass/Fail

The minimum pass percentage is 40% for each Theory Examination and 25% for each part/section of the Examination separately, and 60% marks for each Trade practical Examination.

GENERIC ASSESSABLE OUTCOMES

Outcomes to be assessed/NOSs to be assessed	Assessment criteria for the outcome
Recognize & comply safe working practices, environment regulation and housekeeping.	1.1 Follow and maintain procedures to achieve a safe working environment in line with occupational health and safety regulations and requirements and according to site policy. 1.2 Recognize and report all unsafe situations
	according to site policy. 1.3 Identify and take necessary precautions on fire and safety hazards and report according to procedures. 1.4 Identify, handle and store / dispose off dangerous goods and substances according to site policy and procedures following safety
	regulations and requirements. 1.5 Identify and observe site policies and procedures in regard to illness or accident. 1.6 Identify safety alarms accurately. 1.7 Report supervisor/ Competent of authority in the event of accident or sickness of any staff and record accident details correctly according to site

	Civil Engineering Assistan
	accident/injury procedures.
	1.8 Identify and observe site evacuation
	procedures according to site policy.
	1.9 Identify Personal Productive Equipment
	(PPE) and use the same as per related working
	environment.
	1.10 Identify basic first aid and use them under
	different circumstances.
	1.11 Identify different fire extinguisher and use
	the same as per requirement
	·
	1.12 Identify environmental pollution &
	contribute to the avoidance of instances of
	environmental pollution
	1.13 Deploy environmental protection legislation
	& regulations
	1.14 Take opportunities to use energy and
	materials in an environmentally friendly manner.
	1.15 Avoid waste and dispose waste as per
	procedure.
	1.16 Recognize different components of 5S and
	apply the same in the working environment.
2. Work in a team, understand and	2.1 Obtain sources of information and recognize
practice soft skills, technical	information.
English to communicate with	
	2.2 Use and draw up technical drawings and
required clarity.	documents.
	2.3 Use documents and technical regulations and
	occupationally related provisions.
	2.4 Conduct appropriate and target oriented
	discussions with higher authority and within the
	team.
	2.5 Present facts and circumstances, possible
	solutions &use English special terminology.
	2.6 Resolve disputes within the team
	2.7 Conduct written communication.
3. Demonstrate knowledge of	3.1 Solve different problems like phase angle,
concept and principles of basic	etc. with the help of a calculator.
arithmetic, algebraic, trigonometric,	
statistics, co-ordinate system and	3.2 Demonstrate conversion of Fraction to
apply knowledge of specific area to	Decimal and vice versa.
perform practical operations.	Decimal and vice versa.
4. Read and apply engineering	
	4.1 Read & interpret the information on drawings
drawing for different application in	and apply in executing practical work.
the field of work.	4.2 Read & analyse the specification to ascertain
	the material requirement, tools and
	assembly/maintenance parameters.
	4.3 Encounter drawings with missing/unspecified
	key information and make own calculations
	to fill in missing dimension/parameters to

	carry out the work.
5. Understand and explain the concept in productivity, quality tools, and labour welfare legislation	5.1 Explain the concept of productivity and quality tools and apply during execution of job.
and apply such in day to day work to improve productivity & quality.	5.2 Explain basic concept of labour welfare legislation, adhere to responsibilities and remain sensitive towards such laws.
	5.3 Knows benefits guaranteed under various acts.
6. Explain energy conservation, global warming and pollution and contribute in day to day work by optimally using available	6.1 Explain the concept of energy conservation, global warming, pollution and utilize the available resources optimally & remain sensitive to avoid environment pollution.
resources.	6.2 Explain standard procedure for disposal of waste.
7. Explain personnel finance, entrepreneurship and manage/organize related task in	7.1 Explain personnel finance and entrepreneurship.
day to day work for personal & societal growth.	7.2 Explain role of various schemes and institutes for self-employment i.e. DIC, SIDA, SISI, NSIC, SIDO, Idea for financing/ non-financing support agencies to familiarize with the policies/ programmes, procedure & the available scheme.
8. Understand and apply basic computer working, basic operating system and uses internet services	8.1 Explain the basic hardware of personal computer.
to get accustomed & take benefit of IT developments in the industry.	8.2 Use common application software viz., word, excel, power point etc., in day to day work.
	8.3 Awareness about useful internet websites, search relevant information pertaining to the assigned tasks.
9. Understand and apply Management of Workers, Communication, Coordination and	9.1 Explain management of work, importance of communication and Coordination.
Team Management skills	9.2 Explain Principles of effective communication, Types of communication - verbal, non-verbal, written, email, talking on phone.

SPECIFIC ASSESSABLE OUTCOME:

LEARNING /	
ASSESSABLE OUTCOME	ASSESSMENT CRITERIA
	SEMESTER-I
10. Draw free hand sketches of hand tools used in civil work with proper layout and folding of drawing sheets.	 10.1 Ensure data and information received are sufficient for preparation of drawing 10.2 Sketch horizontal lines from left to right, vertical lines downward, inclined lines in different angles by freehand, 10.3 Draw freehand sketches of tools (viz. hoe, head pan, trowel, wooden float, plumb bob, sand screener) 10.4 Check the drawings to confirm their compliance with the supplied design / object.
11. Draw Symbols, Lettering, Numbering, plane figure applying drawing instruments and practice dimensioning Technique as per BIS.	 11.1 (a) prepare Layout of drawing sheet, (b) prepare a Title block, (c) set and fix drawing paper on the drawing board, (d) mark and fold on the designated drawing Sheet 11.2 (a) Draw parallel lines using T-square and set-square (b) Draw angles of 15° increments by combination of set-squares and check by protractor. 11.3 (a) construct different types of geometrical figures from given data (b) construct ellipse with the given conditions and parabolic curves using the various conditions given 11.4 Add dimensions as per the drawing requirements provided and use relevant and appropriate symbols as per drawing requirement to provide details in the drawings 11.5 (a) Prepare lettering in full scale 25 mm. height size in Vertical & Italic system in 7:4 & 5:4 single stroke & double stoke method both in small & Capital letter. (b) Prepare Numbering in full scale 25 mm. height size in Vertical & Italic system in 7:4 & 5:4 single stroke & double stoke method both. (c) Draw different figures showing different dimensioning system Aligned & Unidirectional 11.6 Check the drawings to confirm their correctness.
12. Construct plain scale, comparative scale, diagonal scale and vernier scale	 12.1 Read and interpret the drawing requirements. Ensure data and information received are sufficient for preparation of drawing. 12.2 Draw different types of scales, 12.3 Find out R.F of the scale; calculate the length of scale on drawing. 12.4 Construct plain scales, comparative scales, diagonal scales and vernier scales, mark the distance on the scale. 12.5 Check the drawings to confirm their correctness.

	Civil Engineering Assistant
13. Draw orthographic projections of different objects with	13.1 Read and interpret the drawing requirements. Ensure data and information received are sufficient for preparation of drawing.
proper lines and	13.2 Carry out necessary calculations to compute dimensions of various components/ parts of drawings.
dimensioning.	13.3 (a) Develop view in orthographic projection by placing
	object between horizontal and vertical plane of axes,
	(b) Generate side view of blocks in different inclination
	on VP and HP by auxiliary vertical plane. 13.4 (a) Write name of the drawing on heading at centre
	alignment,
	(b) Write individual title for every projection drawing,
	(c) Construct drawing views, construction lines and
	dimension lines as per standard.
	13.5 Check the drawings to confirm their compliance with the
	supplied design / object.
	13.6 Draw orthographic projection of line in different plane and in different Position
	13.7 Draw orthographic projection of Plane figure in different
	plane and in different Position.
	13.8 Draw orthographic projection of Solid figure in different
	plane and in different Position.
	13.9 Draw orthographic projection of Section of Solid in
	different plane and in different Position.
14. Draw Isometric,	14.1 Read and interpret the drawing requirements. Ensure
oblique and	data and information received are sufficient for
perspective views of	preparation of drawing.
different solid, hollow	14.2 Carry out necessary calculations to compute
and cut sections with	dimensions of various components/ parts of drawings.
proper lines and dimensions as per	14.3 Construct an Isometric scale to a given length. Draw the isometric projection of regular solids.
standard convention.	14.4 Draw the isometric views for the given solids with
	hollow and cut sections.
	14.5 Draw three views of different isometric objects to
	orthoghraphic
	14.6 Draw the oblique views for the given solids with hollow
	and cut sections.14.7 Draw the perspective views for the given solids with
	hollow and cut sections.
	14.8 Check the drawings to confirm their compliance with the
	supplied design / object.
15. Draw component	15.1 Read and interpret the drawing requirements such as
parts of a single storied residential	rough sketches, specifications, drawing brief, RFD etc. ensure data and information received are sufficient for
building with suitable	preparation of drawing
symbol and scales.	15.2 Construct parts of a building and list the sequence of
	construction.
	15.3 Draw and indicate the levels of different parts of building.

<u></u>	Civil Bitgineering Historian
	15.4 Draw dressing and varieties of finishes, artificial stones, natural bed of stone
	15.5 Draw RCC used in different component parts of a building.
	15.6 Draw timber joints used in doors, windows and arches.
	15.7 Draw steel framing for pre-cast concrete.
	15.8 Use codes and other references that follow the required
	conventions.
	15.9 Draw the appropriate signs and symbols for showing different types of openings used in drawing.
	15.10Draw the signs and symbols of various types of doors windows and ventilators.
	15.11Check the drawings to confirm their compliance with the applied design / object.
16. Create objects on CAD workspace	16.1 Ensure that computer system is correctly operating. Check that all required peripheral devices are connected and correctly operating
using Toolbars,	16.2 Start up the software and adjust the page size,
Commands, Menus, formatting layer and	measurement unit, scale and plot area before staring the work
style.	16.3 Set drawing parameters like, colour, layer, line type, line weight, text font etc. prepare title block for the
	drawing covering specification required.
	16.4 Draw 2D drafting by using CAD toolbars and from set of
	tool icons in ribbon.
	16.5 Draw drawing using shortcut keyboard command,
	creating templates, inserting drawings, Layers, Modify Layers
	16.6 Customize Dimension and Text styles.
	16.7 Provide title and dimension on object drawing.
	16.8 Add Symbols and specifications and use codes and other references as per the drawing requirement.
	16.9 Check drawings to confirm their compliance with the required design.
	16.10Create layout space and viewports,
	16.11Plot the drawing with required scale.
17. Identify different types of building materials i.e. Stones,	17.1 Identify different types of building materials i.e. Stones, Bricks, Lime, Pozzolanic, Cement, Sand, Clay Products, Mortar.
Bricks, Lime,	17.2 Carry out task according to their characteristic, types,
Pozzolanic, Cement, Sand, Clay Products,	use & function in different civil engineering structure.
Mortar their	
characteristic, types,	
use & function.	
18. Mark different types	18.1 Read and interpret the drawing, ensure data and information received are sufficient for completion of

of Foundation and	task.
Set out Foundation	18.2 Carry out necessary calculations to compute
	dimensions of various components/ parts of drawings.
trenches.	18.3 Mark different types of shallow and deep foundation
	18.4 (a) Mark footing for column,
	(b) Mark footings for wall,
	(c) Mark stepped foundation and inverted arch
	foundation,
	18.5 (a) Mark grillage foundation
	(b) Mark raft foundation
	18.6 (a) Mark various types of pile foundation,
	(b) Mark pier foundation,
	(c) Mark well foundation (caisson),
	18.7 Check markings to confirm their compliance with the
	supplied drawing.
40. Damas t	10.4 Dood and interpret the disc in a second state of
19. Demonstrate	19.1 Read and interpret the drawing, ensure data and
different types of	information received are sufficient for completion of task.
brick masonry and	19.2 Arrange required materials to construct a wall.
Tools used in	19.3 Perform construction of wall –
different bonds.	(a) header bond,
Perform construction	(b) stretcher bond,
of wall - header	(c) English bond,
bond, stretcher	(d) Flemish bond .
bond, English bond,	19.4 Check the work to confirm their compliance with the
Flemish bond	supplied drawing.

		Civil Engineering Assistant
		53.6 Prepare material editor using BIM software like Revit.
		53.7 Calculate quantity of materials.
54.	Work out rate analysis of different	54.1 Read and interpret the drawing requirements, specifications, etc. ensure data and information
	item of works with	received are sufficient for preparation of rate analysis.
	detailed	54.2 Carry out necessary calculations to compute estimation and cost analysis.
	Specification.	54.3 Calculate floor area and carpet area
		54.4 Calculate FAR
		54.5 Prepare rate analysis and identify the units of measurement.
		54.6 Calculate quantities of materials and prepare rate analysis from standard data.
		54.7 Calculate quantities of labour required for different item of work from standard data.
		54.8 Calculate the rate per unit of works of different items including labour charges from schedule of rate.
		54.9 Prepare rate analysis of works for Plant machinery.
		54.10Prepare rate analysis of works for over head charge, Profit with the details specification.
		54.11Check rate analysis to confirm their compliance with the design.
55.	Prepare a detail estimate of one room	55.1 Read and interpret the drawing requirements, specifications, etc. ensure data and information
	building by centre	received are sufficient for preparation of estimation.
	line method and	55.2 Carry out necessary calculations to compute estimation and cost analysis.
	separate wall	55.3 Prepare detailed estimate of a building by centre line method and separate wall method.
	method, calculate the quantities of	55.4 Prepare a detailed estimate for – boundary wall, septic tank, underground and overhead reservoir.
	materials involved	55.5 Calculate the quantities of materials in the standard format.
	from the above	55.6 Prepare abstract of estimate.
	estimated quantities	55.7 Check estimation and cost analysis to confirm their
	& prepare a abstract	compliance with the design.
	of cost for the above	
	item of works.	
56.	Perform repair	56.1 Identify the cracks and defect of Plastering, walls for
	plastering, white	white washing and painting, area for flooring, replacing
	washing, painting	of glass, repolishing of floor, stain removal from floor,
	flooring, replacing of	wooden works and remedy of the defects.
	glass, repolishing of	56.2 Prepare estimation and cost analysis for the identified work.
	floor, stain removal	56.3 Make scaffolding for plastering or white washing.
	from floor, wooden	56.4 Demonstrate removal of cracks and defect of
		Plastering.

		Civil Engineering Assistant
	works.	56.5 Perform white washing and painting on walls.
		56.6 Demonstrate removal of cracks and defect of flooring
		56.7 Perform replacing of glass
		56.8 Demonstrate repolishing of floor and stain removal
		from floor
		56.9 Demonstrate wooden works and remedy of the defects.
		F7.4 Islandify the Favordation failure, defeats in atmost on
57.	Perform field training	57.1 Identify the Foundation failure, defects in structure, leaking roof, defects in expansion joint.
	of Foundation failure,	·
	strengthening of	57.2 Prepare estimation and cost analysis for the identified
	foundation,	work.
	Rectification of	57.3 Demonstrate Strengthening of foundation.
		57.4 Demonstrate repairing of defects in structure.
	leaking roof, Repair	57.5 Perform rectification of leaking roof.
	of expansion joint.	57.6 Demonstrate repair of expansion joint.
58.	Demonstrate anti -	58.1 Identify locations for Anti-termite treatment.
	termite treatment and	58.2 Plan to perform Anti-termite treatment.
	Market survey for	58.3 Make a Market survey for different materials used in anti
	different materials	termite treatment and prepare an estimate. 58.4 Arrange required materials for anti - termite treatment
		58.5 Perform anti - termite treatment in different position -
	used in anti termite	a. Pre construction treatment
	treatment.	b. Post construction treatment
		58.6 Check the work to confirm their compliance with the
		required quality.
59.	Layout of house	59.1 Layout the house plumbing and drainage plan.
	plumbing and	59.2 Plan for repairing of service main, waist outlet cleaning
	drainage plan,	of sanitary installation, scrapping and painting of pipes.
	repairing of service	59.3 Demonstrate house plumbing and drainage.
	main, waist outlet	
	,	59.4 Perform repairing of service main, waist outlet cleaning
	cleaning of sanitary	of sanitary installation.
	installation,	59.5 Demonstrate scrapping and painting of pipes.
	scrapping and	59.6 Prepare estimation and cost analysis for the identified
	painting of pipes of a	work.
	new site.	59.7 Check the work to confirm their compliance with the
		required quality.
60.	Demonstrate use of	60.1 Demonstrate use of adhesive in timber.
	Adhesive in timber,	60.2 Demonstrate tile fixing.
	tile fixing, jointing in	60.3 Demonstrate jointing in concrete, joint filler & sealing
	concrete, joint filler &	
	<u>-</u>	compound. 60.4 Check the work to confirm their compliance with the
	sealing compound.	required quality.
		reallitea allality

61. Demonstrate	61.1 Identify the different types of construction equipments in
different types of	Excavation, Hoisting, Conveying, Drilling.
construction	61.2 Dramatize operation of construction equipments in
equipments in	Excavation.
Excavation, Hoisting,	61.3 Dramatize operation of construction equipments in
Conveying, Drilling	Hoisting.
	61.4 Dramatize operation of construction equipments in
	Conveying.
	61.5 Dramatize operation of construction equipments in
	Drilling.
62. Demonstrate	62.1 Prepare and demonstrate a schedule of work in
Construction	construction site.
Management i.e.	62.2 Demonstrate the technique of handling different site
manpower,	problems, solve the problem properly.
materials, machines	62.3 Demonstrate the technique of controlling manpower.
and economy.	62.4 Demonstrate the technique of handling materials and
	payment of different items.
	62.5 Prepare and demonstrate register book to record the
	different purchase of materials, labour payment, tools &
	equipments

SECTION 2 25. EVIDENCE OF LEVEL

OPTION A

Outcomes of the Qualification/Component omain	How the outcomes relates to the NSQF level descriptors	NSQF Level
 Requires Well Developed Skill Create objects on CAD workspace using Toolbars, Commands, Menus, formatting layer and style. Mark different types of Foundation and Se out Foundation trenches. Identify the different types of Protective materials i.e. Paint, Varnish and their application Prepare topography map by contours with levelling instruments. Perform a site survey with Total Station and prepare site plan. Identify timber and perform sawing and planning using hand and power tools. Demonstrate Electrical wiring with fixing of accessories conforming ISI rules (Range of skills - different types of Electrical wiring joining of Fuses, fixing of MCB, connection of lamp with switch and different fitting etc.) Clear choice of procedures in familiar context Prepare reinforcement of different R.C.C 	survey with Total Station and prepare site plan; Prepare topography map by contours with levelling instruments.' as indicated in the learning outcomes to achieve the tolerance levels and accuracy demanded as per the job. The learner requires to apply clear choice of procedures in familiar context as indicated in the learning outcomes like in "Erect scaffolding and make intricate form work at different locations." where the learner has to apply ones knowledge and decide what needs to be done to either meet the client's requirement or identify a fault and decide how to rectify it or plan as per requirements and resources available. Hence NSQF Level is 5 for this descriptor.	

Title/Name of qualification/component: Civil Engineering Assistant Level: 5				
NSQF Domain	Outcomes of the Qualification/Component	How the outcomes relates to the NSQF level descriptors	NSQF Level	
Professional knowledge	members i,e, Foundation, beams, columns, slabs, Retaining Wall, etc. • Erect scaffolding and make intricate form work at different locations • Prepare a bar bending schedule and demonstrate bar bending and calculate the estimated quantity of materials. • Work out rate analysis of different item of works with detailed Specification. Knowledge of facts in the field of work or study • Different types of projection views: Orthographic, Isometric, Oblique and Perspective. • Types, thickness in different position, materials, tools used, defects and remedies, surface preparation for rendering & wall cladding. Knowledge of Principles and general concepts in the field of work or study • Auto level, dumpy Level, Tilting Level introduction, definition components parts, accessories used. Knowledge of processes in the field of work or study • Scaffolding & form work • Basic concept of lift and Escalator • Pile foundation	The learner requires to demonstrate knowledge of facts, principles, processes and general concepts in the field of civil engineering work or study related to construction of various structures viz. Architectural Symbols, Sketching Techniques, Types of projections, Foundation, Carpentry Joints, Structural Drawings etc. Hence NSQF Level is 5 for this descriptor	5	

Title/Name of	qualification/component: Civil Engineering Assis	stant Level: 5	
NSQF Domain	Outcomes of the Qualification/Component	How the outcomes relates to the NSQF level descriptors	NSQF Level
	Special repairAdhesive and joint fillerConstruction equipments		
Professional skill	 Draw orthographic projections of different objects with proper lines and dimensioning. Create objects on CAD workspace using Toolbars, Commands, Menus, formatting layer and style. Mark different types of Foundation and Set out Foundation trenches. Perform different types of Plastering & Pointing, rendering & wall cladding. Prepare different types of Flooring Prepare topography map by contours with levelling instruments. Perform a site survey with Total Station and prepare site plan. Demonstrate surface finish with exact sizing by planning operation 	objects on CAD workspace using Toolbars, Commands, Menus, formatting layer and style, Prepare topography map by contours with levelling instruments, Perform a site survey with Total Station and prepare site plan. "etc. require cognitive and practical skills to accomplish tasks that involve understanding requirements; then as per requirements deciding which operations/procedure will achieve desired result; planning the sequence of operations to maximum effectiveness; constantly checking and reviewing Information & communication system etc., all of which involve problem solving and	5
	 valves, fittings and appliances. Erect scaffolding and make intricate form work at different locations Prepare a bar bending schedule and

Outcomes of the Qualification/Component	How the outcomes relates to the NSQF level descriptors	NSQF Level	
demonstrate bar bending and calculate the estimated quantity of materials.			
 drawing/measurement Mark as per specification applying desired mathematical calculation and observing standard procedure. Understanding of social/political Understand and explain the concept in productivity, quality tools, and labour welfare legislation and apply such in day to day work to improve productivity & quality. Organising information and communication Conduct appropriate and target oriented discussions with higher authority and within the team. Resolve disputes within the team 	outcomes where the learner needs to display desired mathematical skill; understanding of social, political; and some skill of collecting and organising information, communication.	5	
 Construct plain scale, comparative scale, diagonal scale and vernier scale Create objects on CAD workspace using Toolbars, Commands, Menus, formatting layer and style. Mark different types of Foundation and Set 	independently responsible to perform the work as per specifications followed by analysis of what needs to be done based on their understanding of various processes, principles	5	
	Outcomes of the Qualification/Component demonstrate bar bending and calculate the estimated quantity of materials. Desired Mathematical Skills Measure dimension of the components & record data to analyse the with given drawing/measurement Mark as per specification applying desired mathematical calculation and observing standard procedure. Understanding of social/political Understand and explain the concept in productivity, quality tools, and labour welfare legislation and apply such in day to day work to improve productivity & quality. Organising information and communication Conduct appropriate and target oriented discussions with higher authority and within the team. Resolve disputes within the team Conduct written communication. Construct plain scale, comparative scale, diagonal scale and vernier scale Create objects on CAD workspace using Toolbars, Commands, Menus, formatting layer and style.	Outcomes of the Qualification/Component demonstrate bar bending and calculate the estimated quantity of materials. Desired Mathematical Skills • Measure dimension of the components & record data to analyse the with given drawing/measurement • Mark as per specification applying desired mathematical calculation and observing standard procedure. Understanding of social/political • Understand and explain the concept in productivity, quality tools, and labour welfare legislation and apply such in day to day work to improve productivity & quality. Organising information and communication • Conduct appropriate and target oriented discussions with higher authority and within the team. • Resolve disputes within the team • Conduct written communication. • Construct plain scale, comparative scale, diagonal scale and vernier scale • Create objects on CAD workspace using Toolbars, Commands, Menus, formatting layer and style. How the outcomes relates to the NSQF level descriptors The learning outcomes for example 'Measure dimension of the components & record data' and 'Mark as per specification' display the learning outcomes where the learner needs to display desired mathematical skill; understanding of social, political; and some skill of collecting and organising information, communication. Hence NSQF Level is 5 for this descriptor. Hence NSQF Level is 5 for this descriptor. The role of Civil Engineering Assistant is independently responsible to perform the work as per specifications followed by analysis of what needs to be done based on their understanding of various processes, principles	

Title/Name of	qualification/component: Civil Engineering Assis	stant Level: 5	
NSQF Domain	Outcomes of the Qualification/Component	How the outcomes relates to the NSQF level descriptors	NSQF Level
	 Perform different types of Plastering & Pointing, rendering & wall cladding. Prepare different types of Flooring Prepare topography map by contours with levelling instruments. Perform a site survey with Theodolite and prepare site plan Demonstrate surface finish with exact sizing by planning operation Prepare a water supply system in residential buildings using different types of valves, fittings and appliances. Prepare a bar bending schedule and demonstrate bar bending and calculate the estimated quantity of materials. Make different types of arches and lintels with chajja. Prepare Solid Modelling of Architectural /Civil 3D Drawing using 3d Max and Revit software Work out rate analysis of different item of works with detailed Specification. Demonstrate Construction Management i.e. manpower, materials, machines and economy. 	standard/accuracy level. While "Perform different types of Plastering & Pointing, rendering & wall cladding." shows some responsibility for other's works and learning as well.	

NSQF QUALIFICATION FILE

Civil Engineering Assistant

SECTION 3 EVIDENCE OF NEED

26	What evidence is there that the qualification is needed? What is the estimated uptake of this qualification and what is the basis of this estimate?		
	Basis	In case of SSC	In case of other Awarding Bodies (Institutes under Central Ministries and states departments)
	Need of the qualification		The proposed qualification is running in the system for last few decades and passed out candidates are engaged in various related industries.
	Industry Relevance		The job roles defined for the qualification is as per the National Qualification of Occupation 2015 which are developed by Employment Directorate under the ministry of Labour and Employment in collaboration with different industry partners and as per ILO guidelines. These justifies the qualification is very much relevance for
	Usage of the qualification		industry. The Proposed qualification is running in ITI system across the country successfully over the period of time.
	Estimated uptake		The present seating capacity is approximately 208
27		om the concerned ry Body. To be su	Line Ministry of the apported by documentary

	This qualification is run by Ministry of Skill Development and Entrepreneurship and
	different industries under the related line ministry are also generally consulted before
	finalizing the curricula.
28	What steps were taken to ensure that the qualification(s) does (do)
	not duplicate already existing or planned qualifications in the NSQF?
	Give justification for presenting a duplicate qualification
	The qualification is originally designed and approved by NCVT for the Craftsmen Training
	Scheme and is in existence for the last 60 years. NCVT has been entrusted with the
	responsibilities of prescribing standards and curricula for craftsmen training, advising the
	Government of India on the overall policy and programmes, conducting All India Trade
	Tests and awarding National Trade Certificates.
29	What arrangements are in place to monitor and review the
	qualification(s)? What data will be used and at what point will the
	qualification(s) be revised or updated? Specify the review process
	here
	Mentor Council (MC) for the Construction, Construction Material And Real Estate
	sector was formed in 2014 to review the curriculum of this qualification under the
	sector.
	• CSTARI, the research wing of DGT, reviews and updates the qualification, in
	consultation with industries and other stakeholders, on a regular basis by conducting
	trade committee meetings.
	DGT will keep on doing continuous comparative study in the trade by referring to
	relevant upcoming qualifications in the National Qualifications Register (NQR) and
	relevant sectors.

Please attach most relevant and recent documents giving further information about any of the topics above.

Give the titles and other relevant details of the document(s) here. Include page references showing where to find the relevant information.

SECTION 4 EVIDENCE OF PROGRESSION

30	What steps have been taken in the design of this or other qualifications to ensure that there is a clear path to other qualifications in this sector? Show the career map here to reflect the clear progression • Qualifying trainee will obtain an NCVT Certificate in Civil Engineering Assistant trade which gives the following options of progression to the trainee:	
	i) Can take admission in Diploma course in notified branches of Engineering by lateral entry.	
	ii) Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC).	
	iii) Can join Crafts Instructor Training Scheme (CITS) in the trade for	

iv)	becoming an instructor in ITIs. Can join as Assistant supervisor in construction site of high Rise Buildings/Architect's office/Builders
v)	Start own agency for construction equipments contract /own
	building maintenance contract

Please attach most relevant and recent documents giving further information about any of the topics above.

Give the titles and other relevant details of the document(s) here. Include page references showing where to find the relevant information.
